VISION SAFETY NOTICE

 Your lenses meet or exceed American National Standard 200.1 and FDA requirement 2:1CFR Sc 801.410 for impact resistance but are not untreatable or shattappool. Of all the materials that lenses can be made from polycarbonate is the most impact resistant.

 If sinck with sufficient force, the lenses can break into sharp pieces that car cause serious injury to the eye, or blindness. Even if the lenses do not break, the locor of impact may cause the lenses or spectacle frame to contact the major of simulation gave greating follow. The continued impact resistance of your lenses depends on how we you protect them from physical shocks and abuse. For your own protection, scratched or pitted lenses should be replaced immediately.

 in your occupations or recreational activities expose you to the risk of flying objects or physical impacts, your eye safety requires special safety spectacles with safety lenses, side shields, goggles and/or a ful face shield.
